Limited Warranty on Software

The Amanda Company warrants the media on which the software is recorded to be free from defects in materials and faulty workmanship for a period of 90 days from the date the software is delivered. If a defect in the media should occur during this period, you may return the media to The Amanda Company and The Amanda Company will replace the media without charge.

THE AMANDA COMPANY MAKES NO WARRANTIES (OTHER THAN THOSE SET FORTH ABOVE) TO ANY PERSON OR ENTITY WITH RESPECT TO THE PRODUCT OR ANY DERIVATIVES THEREOF OR ANY SERVICES OR LICENSES AND DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION WARRANTIES OF MERCHANTABILITY, PERFORMANCE, NONINFRINGEMENT, AND FITNESS FOR A PARTICULAR PURPOSE. THE AMANDA COMPANY WILL NOT BE LIABLE FOR ANY BUG, ERROR, OMISSION, DEFECT, DEFICIENCY, OR NONCONFORMITY IN ANY SOFTWARE. THE SOFTWARE IS LICENSED “AS IS,” AND THE PURCHASER ASSUMES THE ENTIRE RISK AS TO ITS QUALITY AND PERFORMANCE.

IN NO EVENT AND NOTWITHSTANDING ANY DOCUMENT, REPRESENTATION, OR OTHERWISE, SHALL THE AMANDA COMPANY BE LIABLE TO YOU FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, CONTINGENT, OR CONSEQUENTIAL DAMAGES,

INCLUDING DAMAGES FROM LOSS OR CORRUPTION OF DATA, INTERRUPTED USE, LOST PROFITS, COST OF PROCURING SUBSTITUTE GOODS, TECHNOLOGY OR SERVICES, EVEN IF THE AMANDA COMPANY OR AN AUTHORIZED AMANDA COMPANY DEALER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. YOU AGREE THAT THE AMANDA COMPANY'S LIABILITY ARISING OUT OF CONTRACT, NEGLIGENCE, STRICT LIABILITY, WARRANTY, OR OTHER LEGAL OR EQUITABLE THEORY SHALL NOT EXCEED ANY AMOUNTS PAID BY YOU FOR THIS PRODUCT. Any written or oral information or advice given by Amanda Company dealers, distributors, agents, or employees will in no way increase the scope of this warranty, nor may you rely on such oral or written communication. Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This Agreement shall be governed by the laws of the State of California without regard to the conflicts of laws or provisions thereof.

Fraudulent Usage Advisory

Although the Amanda software is designed to resist fraudulent usage, including unauthorized access to a long distance network, no product, including the Amanda software, is able to prevent such unauthorized usage. The Amanda software is likewise unable to prevent such uses as may constitute an invasion of privacy or other tort. THE AMANDA COMPANY MAKES NO EXPRESS OR IMPLIED WARRANTY AGAINST UNLAWFUL OR UNAUTHORIZED USE OF YOUR AMANDA SYSTEM OR ITS CAPABILITIES AND HEREBY DISCLAIMS ALL LIABILITY ARISING FROM SUCH USE. YOU AGREE TO INDEMNIFY, DEFEND, AND HOLD THE AMANDA COMPANY HARMLESS FOR ANY UNAUTHORIZED OR FRAUDULENT USE OF YOUR LICENSED AMANDA SOFTWARE.

Conventions

This manual uses the following terminology and conventions:

Amanda	The name by which this manual refers to the Amanda@Work.Place system to make reading about the system easier. Because of the name Amanda, the system is also referred to as “she.”
caller	Someone who calls into Amanda. A caller often obtains information, leaves a message for someone, and/or provides information. Because Amanda is referred to as “she,” callers and users are referred to as “he” for clarity.
user	Someone with an extension that Amanda transfers calls to and/or stores messages for. A user can access Amanda to play, delete, and send messages as well as set personal options such as Do Not Disturb.

Indicates that you must log into Amanda and identify yourself.

Indicates that you must listen to a message before you process it. For example, you can forward a message you have just heard.

Using Amanda

Introducing Amanda

Amanda@Work.Group/DOS is an automated telephone attendant and voice processing system designed especially for ease of use and flexibility. To you and the people who call you, Amanda is also a voice on the telephone guiding you to people, services, and messages.

Each user of the Amanda system has both a mailbox and a telephone extension number. These are usually the same number. The extension number is what Amanda dials to reach you when you have a call. The mailbox identifies a record in Amanda's database. The record contains fields that define how Amanda processes your calls. The system administrator initially (and ultimately) controls the contents of these fields, but you can change many of them. For example, you may turn Do Not Disturb on and off during a hectic day. You change the contents of these fields from a touch-tone telephone using a series of menus.

In addition to these fields, each mailbox has greetings that you record. For example, when you cannot answer the telephone, callers hear a greeting that asks them to leave a message.

Your mailbox is configured to ring a telephone extension and record messages from callers. You periodically check your mailbox for messages, or you may be notified that a message exists in a variety of ways.

This chapter explains how to use Amanda@Work.Group/DOS effectively from your office telephone extension and while you are out of the office. However, you don't need this guide at your side every time you call Amanda. She prompts you at every step.

Depending on decisions made by your Amanda system administrator, you may not have access to all the features described here. Check with your system administrator if some of the features appear to be different or missing.

TIP: For best results, answer your telephone at the beginning of a ring.

Logging into Amanda

To perform the operations explained in this chapter, you must log into Amanda, identifying yourself with your mailbox and/or security code. The blank space in the following sets of instructions is for Amanda's telephone number. You get this number from your Amanda administrator.

Dial: _____ (Amanda's number) + * + mailbox + # + security code + #

OR (if your telephone switching system uses an auto-login feature):

Dial: _____ (Amanda's number) + security code + #

NOTE: If Amanda asks for a security code immediately and you are at someone else's extension, use:

Dial: _____ (Amanda's number) + # + * +
mailbox + # + security code + #

OR

You can dial your security code (even though Amanda will say it is an invalid security code). Then provide your mailbox:

Dial: _____ + security code + # + mailbox + #

To log into Amanda from outside of the office:

Dial: _____ (the office number) + * + mailbox + # + security code + #

To dial another user without having to hang-up:

- Dial 9990.

(This is enough 9s to exit the menus and a 0 to hear caller instructions.)

To hang-up from within the menu system:

- Dial **9 9 9 #**.

NOTE: You can hang up on Amanda at any time. However, if you have an older model telephone switching system, Amanda waits to be sure a disconnect has occurred.

If you dial **9 9 9 #** before hanging up, Amanda doesn't need to wait, and the port becomes available faster.

When you see this symbol, use one of the methods of logging into Amanda and identifying yourself that is described in this section.

Setting Up Amanda

As a new Amanda user, you should create a name and extension recording, one or more greetings, a busy message. These preparations allow your callers to know that they have reached you and feel comfortable about your whereabouts. You should also change your security code to ensure that only you and other authorized personnel can access your messages.

Recording Greetings

As a user of Amanda@Work.Group/DOS, you should record the following:

- **A name and extension recording**

Example: "Chris Wang. Extension 247."

Amanda plays this when callers use the employee directory (usually 411) to find your extension number. It is also used to identify you. For example, if a message is sent to you with verification, the sender hears this recording as part of the verification message.

Until you make this recording, Amanda says only the number of the mailbox:

“mailbox 2-4-7.”

- **At least one greeting**

**Log into
Amanda** + **2** + the greeting's number (1-7) + **2** +

record greeting + **#**

When Amanda rings your extension and you do not answer, she plays a greeting. You can have up to seven of these greetings. For example, you can have a daytime greeting, an after-hours greeting, and a vacation or on-the-road greeting. Until you record a greeting, Amanda plays the system greeting, “Please leave a message for,” followed by your name and extension recording. (If you have not recorded the name and extension recording, Amanda plays your mailbox number.)

For example: “This is Chris. I’m away from my desk or on another line. You can bypass this greeting by pressing the # sign twice. To speak to someone else right now, enter that person’s extension or press 0 for assistance. If you leave me a detailed message at the tone, I’ll get back to you as soon as possible.”

These greetings can be manually selected by you or they can be scheduled by an administrator.

- **A busy message** (which callers hear when your line is busy)

**Log into
Amanda** + **3** + **5** + record your busy message + **#**

Amanda plays either a system-wide busy message or your personal busy message whenever your extension is busy.

For example: “This is Chris. I’m talking to someone else at the moment. Press * to hold, enter another extension, or stay on the line to leave me a message.”

After any recording:

To	Dial
Review the recording	1
Rerecord	2
Add to the end of the recording	3
Cancel the recording	4
Save the recording	9

Sample Greetings

This section contains sample greetings for a variety of occasions. It is important that each greeting be as informative as possible. See “Recording Greetings” on page 3 for a standard example of each type of recording: the Name and Extension recording, the Ring No Answer greeting, and Custom Busy greeting.

After-hours Greeting

Many Amanda administrators set up each mailbox so that greeting 1 plays for routine working hours and greeting 2 plays for after-hours calls. Here is an example:

“You have reached the office of Chris Wang at Homestead, Inc. after hours. No one at Homestead can answer your call right now. Leave a detailed message at the tone, or call during office hours: 10 A.M. to 6 P.M., Monday through Friday.”

Away-from-the-office Greetings

“Chris Wang of Homestead, Inc. will be out of town until Monday, May 5th. While I am gone, my associate, Matthew Lee, is handling all my business calls. Please call Matthew at Extension 557. I will be unable to check my messages until I return.”

“Chris Wang of Homestead, Inc. will be off-site until Monday, May 5th. While I am gone, my associate, Matthew Lee, is handling my business calls. Please call Matthew at Extension 557 or leave me a message. I will be checking my messages daily.”

Your Amanda administrator can copy your messages to both you and a coworker while you are on vacation or only to that coworker. (The administrator can stop the message copying when you return.) If someone else is getting your messages, you might want to use the following greeting:

“Chris Wang of Homestead, Inc. will be out of town until Monday, May 5th. My associate, Matthew Lee, is handling all my business calls. Call Matthew at Extension 557 or leave him a detailed message at the tone.”

Managing Recorded Greetings

Use the greetings menu to listen to the current greeting, use a different greeting or rerecord a greeting. (See “Recording Greetings” on page 3 for information about recording greetings.)

To listen to the current greeting:

Changing Your Security Code

Your initial security code is usually your mailbox number or 997. It is a good idea to change it immediately and often.

To change your security code:

Controlling Calls

This section explains how you can screen calls, turn do not disturb on and off, and control what your callers hear when your line is busy or when you cannot answer your telephone.

Screening Calls

By screening calls, you can accept or reject specific calls based on who is calling.

If you share an extension or answer calls for more than one mailbox, you may want to screen calls based on what mailbox is being called. Ask your administrator for more information.

To turn call screening on or off:

When You Are Unavailable

On hectic days or when you are out of the office, you can use Amanda's Do Not Disturb to keep your extension from ringing. Callers hear your greeting immediately and can leave you a message. Your coworkers are also not disturbed by your ringing extension.

To turn Do Not Disturb on or off:

Reviewing Options

You can review the current settings for options such as Do Not Disturb and call screening.

To review option settings:

Scheduling Changes

Amanda can be configured to automatically change your extension, do-not-disturb setting, call screening setting, and your greeting at particular dates and times. See your administrator for details.

Managing Messages

You can listen to messages, then forward them, reply to them, or delete them.

Listening to Messages

You will use Amanda primarily to listen to and send messages.

Usually, Amanda plays messages in the order that they were received (oldest to newest). She makes an exception for urgent messages, playing them in newest to oldest order and prior to any other messages.

Normally, messages are saved until you delete them, so delete old messages from your mailbox as soon as possible.

Your Amanda system may have been configured differently. For example, it may play new messages first or purge old messages after a number of days. Check with your administrator.

To play messages you have received:

Options:

Next message 1	Replay message 2	Delete message 3
Previous message 4	Forward message 5	Reply to message 6
Pause 30 sec./Resume 7	Increase volume 8	Previous menu 9
Rewind a bit *	Decrease volume 0	Fast forward a bit #

Continuous play

7 + **8**

More options:

Restore the message you just deleted

7 + **3**

Play date/time of current message

7 + **4**

Next new message (or next message)

7 + **5**

Continuous delete

7 + **6**

Mark current message as new/unheard

7 + **9**

Forwarding Messages

You can forward messages left for you to any other Amanda user. For example, you might need to reroute a message to the coworker who should have received it in the first place.

Adding a prefix to the forwarded message lets the other user know that you received the message first and allows you to provide instructions regarding the message. You can bypass this step and still set a future delivery date and time.

To forward the message you just listened to:

Options**Dial**

Make the message urgent.

5

Make the message private.

6

(Private messages cannot be forwarded.)

Specify a delivery date and time

7

+ any combination of the following:

NOTE: Any item (day, mon., yr., hr., or min.) not specified takes its value from the current date and time.

If you use 13 through 23 for hours after noon, you are not asked whether you meant A.M. or P.M.

4	+	the month	+	#	+	
3	+	the day of the month	+	#	+	
5	+	the year (use 2 or 4 digits)	+	#	+	
1	+	the hour	+	#	+	<div style="display: flex; align-items: center; gap: 10px;"> <div style="text-align: center;"> 1 (for A.M.) </div> <div style="text-align: center;"> 2 (for P.M.) </div> </div>
2	+	the minutes	+	#	+	

For example, if you create a message Friday afternoon that no one should listen to until Monday morning (June 2nd), set June 2nd at 9:00 A.M. as the delivery date and time:

$\boxed{7} + \boxed{4} + \boxed{6}$ (the month) + $\boxed{\#}$ +
 $\boxed{3} + \boxed{2}$ (the day of the month) + $\boxed{\#}$ +
 $\boxed{1} + \boxed{9}$ (the hour) + $\boxed{\#}$ + $\boxed{1}$ (for A.M.)
 $\boxed{2} + \boxed{0}$ (the minutes) + $\boxed{\#}$ + $\boxed{9}$ (to finish)

If you set a date and time in the past, the message is sent immediately.

NOTES: After forwarding a message you have received or sending a message you have created to one mailbox or list, you can repeat the procedure for another mailbox or list. A configuration option (set by your Amanda administrator) allows messages to be sent to more than one mailbox or list.

When addressing a message as a user, you can press

$\boxed{4} \boxed{1} \boxed{1}$ (or whatever the extension is for your employee directory) to find another user's extension.

Depending on the options set on your system, you might be prompted: "To select this extension, press *. Otherwise, press # to continue." When there are no more matching directory entries, the prompt is: "To search the directory again, press *. Otherwise, press #."

Replying to Messages

You can reply to any messages you received from other Amanda users.

To reply to the message that you just listened to:

(With verification, you are notified when the recipient hears the message.)

Deleting Messages

You can delete messages. If you make a mistake, you can restore a deleted message—but only if you have not changed menus or hung up.

To delete the message that you just listened to:

Be careful because pressing additional **3**'s deletes additional messages.

For example, pressing **3 3** deletes this message and the next.

To restore the most recently deleted message:

repeat to restore additional messages

This works after deleting the message, but not if you have hung up or changed menus.

To delete all messages:

7 + **6**

Sending Messages

When you have an announcement to make to several users or want to leave a message for a user that you know is out of the office, you can send a message to an individual mailbox or a list of mailboxes.

(See “Managing Personal Mailing Lists” on page 16 for more information about lists.)

NOTE: When addressing a message as a user, you can press **4 1 1** (or whatever the extension is for your employee directory) to find another user's extension.

Depending on the options set on your system, you might be prompted: “To select this extension, press *. Otherwise, press # to continue.” When there are no more matching di-

rectory entries, the prompt is: “To search the directory again, press *. Otherwise, press #.”

Being Notified about Messages

Amanda can be configured to notify you when you have a message. She can call your pager to display the total number of messages and the number of new messages. She can use relay paging to display or forward a telephone number entered by your caller (if he pressed # while listening to your greeting). She can even call you at home or on your cellular telephone. She can notify you about all messages and/or about messages marked urgent. All notification methods can be scheduled by time and day of the week. See your administrator for details.

Changing a Pager Number by Telephone

You can change the telephone number for a pager over the telephone.

To change the pager number:

**Log into
Amanda** + + + notification record's number (1–10) +
new pager number +

To exit without changing a notification record, press instead of a record number or pager number.

NOTE: To be changed, the notification record *must* be active and currently contain a number in its Variable field. That field might be a home telephone number or some other number rather than a pager number.

Leaving a Message for Someone Else

If you answer the telephone for more than one person, or even if you get a wrong number, you can allow a caller to leave a message for another user (or mailbox).

How you do this depends on how your telephone switching system transfers or conferences calls. The following procedure tries to cover all cases, but check with your administrator for specific instructions.

To allow a caller to leave a message for someone:

1. Transfer the call to Amanda. (Usually, you press the Conference or Transfer button on your telephone.)

2. After Amanda answers, dial **# 9 9 8 #** or **9 9 8 #**.

9 9 8 # works on any telephone switching system. However, if you hear Amanda say, "That was an invalid entry," just use:

9 9 8 #.

3. Enter the mailbox to receive the message.

4. Complete the call transfer. (Usually, you just hang up.)

Managing Personal Mailing Lists

Amanda allows you to have seven personal mailing lists, which you create and manage using the lists menu. You use these lists to send and forward messages.

To create a mailing list:

+ **4** + record a name or description to identify the list + **#**

To modify an existing mailing list:**Do any (or all) of these:****(to review the list)****1****(to add users to the list)****2** + mailbox + **#** +

(repeat for each mailbox)

(to delete users from the list)**3** + mailbox + **#** +

(repeat for each mailbox)

(to rename the list)**4** + rerecord list name + **#**
or description**Log into
Amanda****5**

+ the list's number (1-7) +

Managing Messages Sent by Fax

A message can be faxed to your mailbox. Amanda lets you know that the message is a fax. You can retrieve it by:

- Calling from a fax machine
- Providing the telephone number for a fax machine

To get a particular fax message when calling from a fax machine:**Log into
Amanda****1**+ locate the fax message + **7** + **1** +

press the Start button on your fax machine

To get all fax messages when calling from a fax machine:

 **Log into Amanda** + **1** + **7** + **0** +

press the Start button on your fax machine

To get a particular fax message when *not* calling from a fax machine:

 **Log into Amanda** + **1** + locate the fax message + **7** + **2** +

fax machine's telephone number + **#**

Managing Guest Mailboxes

If your Amanda system administrator has configured the system to allow guests, you can give a guest mailbox to another person. In this way, someone working for you temporarily can receive messages. He can check for those messages using any extension that has access to Amanda.

The guest mailbox's privileges are those defined by the guest mailbox template (usually mailbox 996). Check with your Amanda system administrator to determine the security code.

To create a guest mailbox:

 **Log into Amanda** + **6** + **1** + write down the guest mailbox

The security code is usually the same number as the guest mailbox. Check with your administrator to be sure.

To access a guest mailbox:

Dial: _____ (Amanda's number) + **998#** (or **#998#**) +

host's mailbox + **#** + ***** + guest mailbox + guest's security code

Now the guest can use Amanda's services.

To leave a message for a guest:

Dial: _____ (Amanda's number) + **9 9 8 #** (or **# 9 9 8 #**) +

host's mailbox + **#** + guest mailbox + hear guest's greeting +

leave message

To delete a guest mailbox:

**Log into
Amanda** +

6 +

2 +

the guest mailbox to be deleted

To review your guest mailboxes:

**Log into
