

MightyCall

Why Choose MightyCall
2023

MightyCall offers a **secure and reliable hardware-free**, cloud-based phone system that knows your business needs to be **flexible** in its customer communications.

That's why our **robust feature set** & **supercharged VoIP core** work to maximize your business communications for:

- Stationary or on-the-go setups
- New or growing companies
- Constant or contained callflows

MightyCall — Business communications *your way*

5 *reasons* to choose MightyCall

1. Set up the system in minutes

With no hardware necessary, you can download the mobile app and start using MightyCall within minutes of signing up

4. Straightforward and intuitive interface

User-friendly UI and simplified flowcharts make MightyCall a VoIP system that will delight VoIP users

2. The best pricing around

With lower per user prices than nearly all the major big name VoIP providers, pay less without getting less

5. A full set of VoIP features

Get dozens of features for the price you see to bring more power into your business communications

3. Safe, secure, & reliable

99.99% service uptime means your calls will be as reliable as any other network, and world-class security and compliance make MightyCall one of the most trustworthy VoIP providers around

"Paul Amenta - Evolution Solar"

What do you like best?

The customer support is first class. Every time a problem arose, it was handled immediately! When the phone rings it can go to multiple employees at the same time as well. Love it!

**John Y**

Small-Business (50 or fewer emp.)

"Great option for a small company!"

What do you like best?

We have used several phone systems over the years. Most of them were expensive, feature bloated, difficult to use and clunky to configure. We have been impressed with how much easier MightyCall was to use across all these areas. It's a good fit for us, and we saved a bundle.

★★★★★ Nov 17, 2021

**Susan B**

Small-Business (50 or fewer emp.)

"Great service"

What do you like best?

MightyCall has made our call campaigns so much easier! My favorite part about the system is being able to just copy and paste the number into a desktop app versus having to dial each number by hand with a landline phone. I highly recommend the system for any small business.
